

Table of Content PCIM Europe 2023

Keynote

- K01** **»How Life Cycle Analyses are Influencing Power Electronics Converter Design«**
Franz Musil, Fronius International, A
- K02** **»On the Way to the DC Factory – The Open Industrial DC Grid for Sustainable Production Sites is Entering the Dissemination Phase«**
Holger Borchering, iFE - Institut for Energy Research, Ostwestfalen-Lippe University of Applied Sciences and Art, D
- K03** **»HV Silicon and SiC Power Semiconductors; Key Components for Sustainable Energy Solutions«**
Munaf Rahimo, MTAL, CH

GaN Devices

- OP001** **Integrated Multi-Gate Cascade Structure for Lateral High-Voltage GaN Power Transistors**
Richard Reiner, Michael Basler, Michael Mikulla, Stefan Moench, Stefan Müller, Rüdiger Quay, Patrick Waltereit, Fraunhofer IAF, D
- OP002** **Towards Vertical GaN Power Transistors on Foreign Substrates: The European YESvGaN Project**
Christian Huber, Jens Baringhaus, Mirjam Henn, Thomas Kaden, Stefan Regensburger, Robert Bosch, D
- OP003** **GaN Power ICs Drive Efficiency and Size Improvements in BLDC Motor Drive Applications**
Alfred Hesener, Navitas Semiconductor, D
- OP004** **Reliability Investigations on 650 V Schottky p-GaN Power Gallium Nitride HEMTs**
Maximilian Goller, Thomas Basler, Jörg Franke, Josef Lutz, Chemnitz University of Technology, D

Package Reliability I

- OP005** **Condensation Test: Methodology and Robustness Against it for Power Modules Employed in Railway Applications**
Edoardo Ceccarelli, Thomas Gloor, Milad Maleki, Gontran Paques, Olivier Quittard, Hitachi Energy, CH
- OP006** **Impact of Current Density on Wire Bond Lifetime – Power Cycle Testing with Clamped VCE for Realistic Current Stress**
Ralf Schmidt, Michael Endres, Siemens, D; Marcel Sippel, Friedrich-Alexander-University Erlangen-Nuremberg, D
- OP007** **Physics-of-Failure Model to Explain the Heating-Time Effect on IGBT Power Modules Lifetime**
Merouane Ouhab, Nicolas Degrenne, Mitsubishi Electric, F;
Yusaku Ito, Shinichi Izuo, Mitsubishi Electric, J
- OP008** **A Standard Low Voltage Power Module Platform with High Reliability and Low Cost**
Harley Neal, Shreyas Malasani, Muhammad Morshed, Xiang Li, Matthew Packwood, Yangang Wang, Dynex Semiconductor, GB

Converter Design and Optimization

- OP009** **Towards a Modular Multilevel Flying Capacitor Module Using SiC MOSFET**
Omar Sanjakdar, Luis Gabriel Alves Rodrigues, French Alternative Energies and Atomic Energy Commission, F; Yvan Avenas, G2ELAB, F
- OP010** **Parallel Operation of Direct Current Transformers**
Renan Barcelos, Drazen Dujic, EPFL, CH
- OP011** **Optimal Design of Multiwinding-Transformer-Based Power Architectures in Data Center Applications**
Qian Xun, Fraunhofer Institute for Silicon Technology, D; Marco Liserre, Thiago Pereira, Kiel University, D
- OP012** **An ANN Assisted Reverse Recovery of Diode Model for Switching-on Characteristics of IGBT Devices**
Abby Shih, Keysight Technologies, D; Felix Zeyss, Zeeshan Umar, Stefan Haensel, Siemens, D; Steven Lee, Huaiyuan Zhang, Keysight Technologies, USA

Power IC

- OP013** **Optimum Power Architecture for USB-PD EPR**
Alfredo Medina Garcia, Martin Krüger, Markus Schmid, Josef Daimer, Infineon Technologies, D; Manfred Schlenk, Dr. Schlenk-Consulting, D
- OP014** **CT-Drive - A Simple Two Dice Solution Coreless Transformer Driver for Integrated GaN GIT Devices**
Kenneth Leong, Derek Bernardon, Diego Dias De Menezes, Thomas Ferianz, Bainan Sun, Infineon Technologies Austria, A
- OP015** **GaN Power ICs Enable 300cc 700kHz 300W AC-DC Converter**
Tom Ribarich, Navitas Semiconductor, USA;
Akos Hodany, Navitas Semiconductor, EU
- OP016** **Safe and Secure SW Controlled Digital LDO**
David Zipperstein, Markus Bichl, Holger Dienst, Mihail Jefremow, Ralph Mueller-Eschenbach, Juergen Schaefer, Arndt Voigtlaender, Infineon Technologies, D

Passive Components I

- OP017** **Parasitic Component Reduction of a Two-Winding Transformer**
Claus Kjeldsen, Christian Østergaard, University of Southern Denmark, DK
- OP018** **Polymers in Film Capacitors – The Next Generation Material is Available!**
Udo Wahner, Borealis Polyolefine, A; Carlos Alba, TDK Electronics, E
- OP019** **FE Modeling and Development of a High-Frequency Coreless Transformer for Impulsive Automotive Applications**
Danilo Santoro, Paolo Cova, Nicola Delmonte, University of Parma, I;
Simone Daniele, Federal-Mogul Italy, I
- OP020** **Litz Wire Configurations for Charging Applications: A Field Study**
Martin Nießen, Claudius Fournier, Christian P. Dick, Cologne University of Applied Sciences, D; Volkmar Platte, Marius Masset, Elektrisola Dr. Gerd Schildbach, D;
Benedikt Schmuelling, University of Wuppertal, D

SiC Device Technology

- OP021** **Prediction of the Bipolar Degradation in 1200V 4H-SiC MOSFETs by Inspection in Device Fabrication Process**
Kazuya Ishibashi, Hiroyuki Amishiro, Akihiko Furukawa, Akifumi Imai, Yasuhiro Kagawa, Yukiyasu Nakao, Takanori Tanaka, Nobuyuki Tomita, Hiroshi Watanabe, Mitsubishi Electric, J

OP022 **Improved Short Circuit Ruggedness by Optimization of Sidewall P-type Pillar Ratio for Trench SiC-MOSFET Fabricated by Multiple Tilted Ion Implantation into Trench Sidewalls**
Yutaka Fukui, Kohei Adachi, Akihiko Furukawa, Shiro Hino, Shigeto Honda, Yasuhiro Kagawa, Kazuyasu Nishikawa, Katsutoshi Sugawara, Mitsubishi Electric, J

OP023 **Research of Characterization for Activation Rate of Ion Implantation in SiC Power Device Manufacturing**
Songlin Yang, Kongjing Li, Yangang Wang, Dynex Semiconductor, GB Qin Liu, Chengzhan Li, Zhu Qiwei, Zhuzhou CRRCC Times Semiconductor, CHN

Package Reliability II

OP024 **Study of Power Cycling Tests Superimposed with Passive Thermal Cycles on IGBT Modules**
Alexander Otto, Rico Eichhorn, Sven Rzepka, Fraunhofer Institute ENAS, D; Thomas Basler, Xing Liu, Josef Lutz, Chemnitz University of Technology, D

OP025 **Physics-of-Failure Based Lifetime Approach for Silver Sintered Power Modules in Power Cycling**
Freerik Forndran, Markus Leicht, Martin Metzler, Vitesco Technologies, D; Jens Heilmann, Bernhard Wunderle, TU Chemnitz, D

OP026 **Experimental Investigation of Advanced Cu-Mo-Cu Clips for Enhanced Power Cycling Reliability of Die-top Interconnections**
Harley Neal, Xiang Li, Shreyas Malasani, Muhammad Morshed, Matthew Packwood, Dynex Semiconductor, GB

WBG Devices and Applications

OP027 **Power Loss Calculation Tool for N-level Half-bridge Sub-module Modular Multilevel Converter used for Offshore Wind Energy**
Kesheng Wang, Ian Laird, David Barton, Saeed Jahdi, University of Bristol, GB

OP028 **Simulation Study of the Effect of Threshold Voltage Hysteresis on Switching Characteristics of SiC MOSFETs**
Yumeng Cai, Hans-Peter Nee, KTH, S; Hao Xu, Peng Sun, Zhibin Zhao, Xuebao Li, NCEPU, CHN; Erping Deng, Hefei University of Technology, CHN

OP029 **Comparison of Simulation Methods to Study the Switching Transients of GaN Transistors**
Xiaomeng Geng, Sibylle Dieckerhoff, Carsten Kuring, Technical University Berlin, D

System Reliability

- OP030** **Partial Discharge Analyses of DBC Substrates**
Johannes Drechsel, Henry Barth, Lars Rebenklau, Fraunhofer IKTS, D
- OP031** **Development of Ag-Free Active Metal Brazing Filler for Manufacturing Copper-Si₃N₄ Substrates**
Yoichiro Mori, Sachiko Fujisawa, Hiromasa Kato, Kazumitsu Morimoto, Masakazu Yonei, Seiichi Suenaga, Toshiba Materials, J
- OP032** **Improving High-Power Crowbar Design Using Rupture-Enhanced, Capsule-Style Thyristors in Medium-Voltage Driven Applications**
Martin Schulz, Julian Pitman, Littelfuse Europe, D; Francisco Llopis, Llorenç Latorre, Power Electronics, ES

Power Electronics For Railway Traction

- OP033** **Coupling Dynamics of Second-Order Harmonic Active Filters in Single-Phase Input-Series/Output-Parallel AC-DC Converters**
Andrea Cervone, Tianyu Wei, Drazen Dujic, EPFL, CH
- OP034** **Performance Analysis of a PEBB Demonstrator with High Power 3.3 kV CoolSiC in XHP 2 for Modern Railway Traction Systems**
Jens Czichon, Vishal Jadhav, Ulrich Schwarzer Infineon Technologies, D; Nils Hoffmann, Ingenieurbüro Hoffmann, D
- OP035** **Experimental Validation of a Semi-Two-Stage Traction System based on the NPC Multi-Source Inverter for Fuel Cell Rail Vehicles**
Emanuele Fedele, Diego Iannuzzi, Ivan Spina University of Naples Federico II, I

Special Session: Solutions for Future Medium Voltage Grids

- OP036** **Itilevel Converter System for Medium Voltage Grids**
olas Lapassat, Pierre-Louis Garmier, Franck Terrien, Christof Sihler, GE Vernova Power Conversion, F
- OP037** **Discontinuous Quasi-2-Level Modulation for MV Applications**
Anatolii Tcai, Thiwanka Wijekoon Huawei, D; Marco Liserre, Christian-Albrechts-University, D
- OP038** **Fault Management in Meshed MVDC Grids Enabling Uninterrupted Operation**
Sven Marquardt, Christopher Dahmen, Thomas Brückner, Universität der Bundeswehr München, D
- OP039** **Design of Oil Insulated SiC Diode Rectifier for an MVDC SST**
Pierre Le Métayer, Hugo Reynes, Piotr Dworakowski, SuperGrid Institute, F; Cyril Buttay, University of Lyon, Laboratory Ampère, F; Drazen Dujic, EPFL, CH

- OP040** **MVDC Distribution Concept for Green Data Centers: Achieving the Sustainability Roadmap with Highest Efficiency**
Daniel Siemaszko, Stefanie Heinig, Marko Mogorovic, Hitachi Energy, CH;
Chunming Yuan, Hitachi Energy, CHN; Javier Iglesias, Hitachi Energy, E

Advanced IGBT's and Modules

- OP041** **Investigation of Paralleling Topologies for the New 1500 A 1700 V LinPak Power Module**
Nick Schneider, Andreas Baschnagel, Luca De-Michiellis, Milad Maleki, Toni Ruiz, Peter Sültmann, Elizabeth Buitrago, Gontran Pâques, Hitachi Energy, CH
- OP042** **RC-IGBT Module Suitable for Motion Control**
Nobuchika Aoki, Masaomi Miyazawa, Takahiro Nakatani, Mitsubishi Electric, J;
Koichi Masuda, Thomas Radke, Mitsubishi Electric Europe, D
- OP043** **4.5 kV HV100-type HVIGBT Module for Large Industrial Equipment**
Kazuto Mikami, Kenji Hatori Mitsubishi Electric, J.
Nils Soltau, Mitsubishi Electric Europe, D
- OP044** **Design Considerations for the EDT3 750V Next Generation IGBT Technology for Automotive Drive Applications**
Alexander Beckmann, Andre Christmann, Ilaria Imperiale, Christian Sandow, Cedric Ouvrard, Frank Wolter, Infineon Technologies, D
- OP045** **Novel MOS-cell Engineered 4.5 kV Enhanced-Planar IGBT Device for Improved Short-Circuit Capability**
Gaurav Gupta, Luca De-Michiellis, Nick Schneider, Gontran Paques, Babak Nikberg, Jeremy Jones, Hitachi Energy, CH

Thermal Performance and Measurement

- OP046** **Performance Enhancements and Easy Integration of Double Side Cooled Automotive SiC Power Modules - Enabled by a Sophisticated Cooler System**
Christian Schweikert, Dustin Meichsner, Infineon Technologies, D; Stefan Bruns, Erwin Quader Systemtechnik, D
- OP047** **Additive Manufactured Heat Sink with Integrated Pulsating Heat Pipe**
Florian Schwarz, Rolf Hellinger, Siemens, D;
Markus Langer, Oliver Sombrowski, Toolcraft, D
- OP048** **Calorimetric Characterizations of a High Efficiency GaN Based 30 kW – 1500 V Solar String Inverter**
Van Sang Nguyen, Anthony Bier, Stephane Catellani, Gerard Delette, Ulrich Soupremanien CEA Tech, F

- OP049** **Machine-Learning Approach to Model Junction Temperatures in Automotive Inverters**
Leonhard Hertenstein, Maximilian Hepp, Wolfgang Wondrak, Mercedes-Benz, D
- OP050** **Inorganic Potting Compound for Electrical Machines to Improve the Thermomechanical Behaviour**
Sönke Fleck, Ulf Schümann, University of Applied Sciences Kiel, D

Energy Storage Systems

- OP051** **Demand Side Management for Electric Vehicles: A Rural Perspective**
Thomas McKinney, Erica Ballantyne, David Stone, University of Sheffield, GB
- OP052** **Methodology for Multiple SoC Estimation in Lithium-Ion Battery Packs Based on an Adaptive Square-Root Unscented Kalman Filter**
Davide Fusco, Mauro Di Monaco, Francesco Porpora, Giuseppe Tomasso, University of Cassino and Southern Lazio, I
- OP053** **Key Points Regarding Electrical Safety in Small Cylindrical Li-ion Cell Assemblies During Overcharge or Partial Short-Circuit**
Julien Chauvin, Daniel Chatroux, Laurent Garnier, Remi Vincent, Philippe Azais, CEA, F
- OP054** **Predictive Control of Supercapacitors for Peak Power Reduction in Stacker Cranes in Intralogistics**
Fabian Melkowski, Wilfried Hofmann, Technical University of Dresden, D
- OP055** **Real-Time AC Impedance Measurement Using Limited Energy Onboard Excitation for Battery Management System**
Chun Kit Cheung, Manxin Chen, Ziyang Gao, Meng Chen, ASTRI, HK

Passive Components II

- OP056** **Design and Testing of a Compact Dry Insulated Medium Frequency Transformer Prototype for Medium Voltage Applications**
Martin Guillet, Alexis Fouineau, Hugo Reynes, Servane Haller, Sophie Iglesias, Nicolas Deveaux, SuperGrid Institute, F; Thiwanka Wijekoon, Mirosljub Bakic, Huawei's Nuremberg Research Center, D
- OP057** **Evaluation of the Impact of Switching Speed on Inductors in SiC Converters**
Binyu Cui, Jun Wang, Juefei Yang, Xibo Yuan, University of Bristol, GB
- OP058** **Comparison of High Frequency Three Phase Transformer Technologies for High Power Density On Board Chargers**
Wendell da Cunha Alves, Valeo Siemens eAutomotive, F;
Norbert Messi, Valeo Powertrain Electrified Mobility, F

- OP059** **Towards a Multiphysics FEM Simulation Model of an Arbitrary Inductive Component for Power Electronic Applications**
Christoph Drexler, Michael Schmidhuber, SUMIDA Components & Modules, D
- OP060** **Considering 2D Magnetic Fields and Air Gap Geometry in the Estimation of AC Losses in Round Wire Windings**
Marcelo Lobo Heldwein, Technical University of Munich, D;
Andre Furlan, Federal University of Santa Catarina, BR

Special Session: Power Electronics for E-Mobility

- OP061** **The Impact of SiC Traction Converter Switching on EV DC Bus and Battery**
Sibylle Dieckerhoff, Michael Schlüter, Marius Gentejohann, Erik Goldammer, Julia Kowal, Technical University of Berlin, D; Maximilian Hepp, Wolfgang Wondrak, Mercedes-Benz, D
- OP062** **Loss Distribution in an Electric Vehicle Traction Chain using a Cascaded H-Bridge Inverter with Integrated Battery**
Gaël Pongnot, Clément Mayet, Denis Labrousse, SATIE Laboratory, F
- OP063** **Design Aspects in SiC MOSFET based High Performance Automotive and Commercial Vehicle Inverters**
Matthias Bösing, Daniel Schweiker, Robert Bosch, D

Power Electronics for Automotive

- OP064** **Performance and Feature Benchmarking of SiC Trench Technologies and Cooling Systems for DSC Modules in Traction Inverters**
Dustin Meichsner, Matias Leitner, Anthony Thomas, Christian Schweikert, Ben Rosam, Infineon Technologies, D
- OP065** **Current Harmonics in a Complex Automotive DC Bus of an Electric Vehicle Compared to a Standard Laboratory Setup**
Michael Schlüter, Marius Gentejohann, Sibylle Dieckerhoff, Technical University of Berlin, D
- OP066** **800-V SiC Traction Inverter Key Design Considerations for Improved Efficiency and Power Density**
Xung Gong, Texas Instruments, D

New and Renewable Energy Systems

- OP067** **A High-Current 1.7 kV SiC Module Enabling High Efficiency, High Power Density Renewable Energy Applications**
Ahmed Ismail, Ahmad Al-Hmoud, Yue Zhao, University of Arkansas, USA;
Ashish Kumar, Kraig Olejniczak, Wolfspeed, USA

- OP068** **Trends and Influencing Factors in Power-Converter Reliability of Wind Turbines**
Katharina Fischer, Karoline Pelka, Julia Walgern, Fraunhofer IWES, D
- OP069** **Bidirectional Multi-Port Partial Power Converter for Solar PV Application**
YongDae Kwon, Francisco Freijedo, Thiwanka Wijekoon, Huawei Technologies, D

Packaging and Integration

- OP070** **Reliability of Molded POL Tile as Simple Module**
Kei Murayama, Mikiko Kobayashi, Shota Miki, Shinko Electric Industries, J
- OP071** **3.3 kV 800 A IGBT Module with High Power Cycle Durability Fulfilling Roll2Rail Target**
Kanta Makabe, Taiga Arai, Akitoyo Konno, Katsuaki Saito, Hitachi Power Semiconductor Device, J
- OP072** **Fabrication Refinements and Evaluation of a Wirebond-less Multi-chip Power Module with 13 kV SiC Devices**
Danielle Lester, Mark Cairnie, Christina DiMarino, Virginia Tech, USA

Cu-Sintering

- OP073** **Copper Sintering Pastes for Die-Bonding and Large Area Bonding**
Hideo Nakako, Dai Ishikawa, RESONAC Corporation, J; Michiko Natori, Hideaki Yamagishi, Showa Denko Materials, J; Kazuhiko Minami, Seiji Matsushima, Showa Denko, J
- OP074** **Bonding Properties and Reliability Evaluation of Cu Sinter Paste for Pressure Sintering**
Takashi Hattori, Kei Anai, Yamauchi Shinichi, Mitsui Mining & Smelting, J
- OP075** **Crystallographic Examination of High Thermal Stability of Dense Sintered Copper Layer**
Takaaki Eyama, Shuichi Inaya, Ukyo Suzuki, Masafumi Takesue, Kao, J

SiC Device Design

- OP076** **Impact of Operating a SiC-MOSFETs Body Diode Beyond its SOA**
Michael Rauh, Mark-M. Bakran, University of Bayreuth, D;
Stefan Schönewolf, Andreas März, Siemens Mobility, D
- OP077** **Avalanche Robustness of SiC MOSFETs in Parallel Connections**
Clemens Herrmann, Mohamed Alaluss, Mengi He, Thomas Basler, Josef Lutz, Chemnitz University of Technology, D

- OP078** **A Novel 2200 V Schottky Barrier Diode-Embedded SiC MOSFET Module**
Takahiro Ogata, Hiroshi Kono, Saho Fujii, Tanaka Tsuguhiko,
Toshiba Electronic Devices & Storage, J; Georges Tchouangue,
Toshiba Electronics Europe, D
- OP079** **CoolSiCTM Trench MOSFET Chip Design for the 3.3 kV Class**
Caspar Leendertz, Michael Hell, Guang Zeng, Paul Sochor,
Rudolf Elpelt, Konrad Schraml, Dethard Peters, Infineon Technologies, D;
Thomas Ganner, Thomas Söllradl, Infineon Technologies, A

Special Session: Understanding Losses in WBG Power Devices

- OP080** **Switching Loss and Coss Hysteresis Loss in Power Devices**
Jaume Roig, onsemi, B
- OP081** **Characterization of COSS Losses in Power Semiconductor at High Frequencies**
Juan Rivas-Davila, University of Stanford, GB
- OP082** **Switching Losses in Power Devices - From Dynamic on Resistance to Output Capacitance Hysteresis**
Elison Matioli, POWERlab, EPFL, CH
- OP083** **Dynamic R_{dson} in GaN HEMTs: Physical Origins and System Design Considerations**
Nicholas Dellas, Infineon Technologies, A

High Power SiC Converters

- OP084** **Open Loop Approach to Balance Cross Currents in Time Staggered Switching SiC-Converters**
Simon Johannliemke-Appelbaum, David Reiff, Volker Staudt,
Ruhr-University of Bochum, D
- OP085** **Switching Behaviour of a SiC-MOSFET 3-Level ANPC Inverter with Different Modulation Schemes**
Johannes Häring, Mark-M. Bakran, University of Bayreuth, D;
Wolfgang Wondrak, Maximilian Hepp, Mercedes-Benz, D
- OP086** **Experimental 500kW Hybrid Si/SiC ANPC Inverter**
To Pham Ha Trieu, Hans-Günter Eckel, University of Rostock, D
- OP087** **Investigation of Short Circuit Faults in 3300 V SiC MOSFET Based Half Bridge Submodules for HVDC Converters**
Lukas Bergmann, Mark-M. Bakran, University of Bayreuth, D;
Marcus Wahle, Siemens Energy, D

High Frequency Converters and Applications

- OP088** **Converters with Multiphase Magnetics: TLVR vs CL and the Novel Optimized Structure**
Alexandr Ikriannikov, Analog Devices, USA, Di Yao, Uber, USA
- OP089** **A High Gain Passive/Active Switched-LC DC-DC Converter**
Ahmed Allehyani, University of Jeddah, KSA
- OP090** **A Differential Relaxation Half-Bridge Oscillator for Inductive Power Transfer**
Norbert Seliger, University of Applied Sciences Rosenheim, D
- OP091** **High Efficiency and High-Power Density Totem-Pole PFC with SiC MOSFETs**
Yuequan Hu, Anuj Narain, Tamanna Bhatia, Wolfspeed, USA;
Iris Liu, Kevin Xie, Wolfspeed, CN

DC-DC Converters

- OP092** **Implementation and Characterization of a 200 kW Full-SiC Isolated DC-DC Converter for Future Medium Voltage PV Plants**
Minh Nhut Ngo, Anthony Bier, Sebastien Dumenil, Marc Jung, Jérémy Martin CEA, F; Sébastien Sanchez, Philippe Ladoux, University of Toulouse, FR
- OP093** **High-Frequency High-Efficiency LLC Module with Planar Matrix Transformer for CRPS Application Using GaN Power IC**
Bin Li, Xiucheng Huang, Tao Wei, Jason Zhang, Justin Zhu, Navitas Semiconductor, USA
- OP094** **DC-Ready Photovoltaic Solar Converter**
Oleksandr Matiushkin, Oleksandr Husev, Dmitri Vinnikov, Jarek Kurnitski, Tallinn University of Technology, EST
- OP095** **High Power-Density, Bi-Directional, 48 V to 12 V Converter using eGaN FETs for Next Generation BEV's**
Michael de Rooij, John Glaser, Alejandro Pozo Arribas, EPC, USA

SiC Device Application

- OP096** **Advanced SiC Trench-MOS Technology for Automotive Application**
Stephan Schwaiger, Alberto Martinez-Limia, Karl Oberdieck, Christian Förster, Klaus Heyers, Robert Bosch, D
- OP097** **Application of Newly-Developed 2.3 kV Si and SiC Devices to Renewable Energy System**
Shuangching Chen, Taku Takaku, Yusuke Sekino, Yasuyuki Kobayashi, Yoshiyuki Kusunoki, Kaname Mitsuzuka, Keiji Okumura, Yuichi Onozawa, Takafumi Uchida, Fuji Electric, J; Ben Bradel, Fuji Electric, D

- OP098** **Application-close Study of a SiC JFET Cascode Switching Characteristic under dV/dt -Limitations**
Josefine Dukar, Klaus Marahrens, SEW-EURODRIVE, D; Thomas Basler, Maximilian Goller, Chemnitz University of Technology, D

Power Electronics for Charging Station

- OP099** **Evaluation of Silicon-Based 3-Level T-Type Neutral Boost Rectifier Integrated into SMPD Package for EV Charger Applications**
Karsten Haehre, Muhammad Yassof, Martin Schulz, Littelfuse, D; Philippe di Fulvio, Littelfuse, F
- OP100** **Characterization of Si IGBTs in ZCS for EV Charger Applications**
Salvatore Race, Ivana Kovacevic-Badstuebner, Thomas Ziemann, Ulrike Grossner, ETH Zurich, CH; Maria Cotorogea, Arnab Biswas, Franz-Josef Niedernostheide, Infineon Technologies, D; Lukas Riegler, Riccardo Tinivella, BRUSA, CH
- OP101** **Resonant, Bidirectional 22 kW DC-Stage for Chargers Using Quantum Control Featuring Load Independent ZVS Achieving 99,2 % eff.@ 5,7 kW/L**
Martin Nießen, Georg Jöntgen, Christian P. Dick, Cologne University of Applied Sciences, D; Benedikt Schuelling, University of Wuppertal, D
- OP102** **An Interoperable 50kW Inductive Power Transfer Design for Opportunity Wireless Vehicle Charging**
Irene Torres-Alfonso, Carlos Costas-Sos, Juan M. Perie-Buil, Antonio-Miguel Munoz-Gomez, Antonio Bernal-Martinez, Juan L. Villa, Oscar Garcia-Izquierdo, Fundación CIRCE, E

Sensing and Measurement

- OP103** **Development of Method for Thermal Diffusivity Measurement of Thin and High Conductive Ceramics**
Martina Schmirler, Stefan Britting, Karsten Schmidt, ROGERS, D; Arno Kaiser, Andreas Böhme, Tim Gestrich, Fraunhofer IKTS, D
- OP104** **Acquisition of the DC-Link Voltage only by Measuring the Gate-Source-Voltage of a SiC MOSFET**
Zheming Li, Mark-M. Bakran, University of Bayreuth, D
- OP105** **An Innovative Current Measurement Method for High Current Space DC/DC Converters**
Thomas Harmand, Cédric Colonna, 3D PLUS, F; Patrick Dubus, Powelogy, F, Denis Labrousse, SATIE, F
- OP106** **Design of a Low Cost Over Temperature Detector using the Internal Gate Resistance as TSEP**
Vincent Quemener, Nicolas Degrenne, Mitsubishi Electric, F; Shinichi Izuo, Chihiro Kawahara, Mitsubishi Electric, J

SiC Devices I

- PP001** **Active Clamping for SiC MOSFET's Body Diode During Reverse-Recovery**
To Pham Ha Trieu, Hans-Günter Eckel, University of Rostock, D
- PP002** **Reverse Recovery Behavior in SiC-MOSFETs: Characterization and Modelling**
Andreas Hürner, Paul Sochor, Qing Sun, Rudolf Elpelt, Infineon Technologies, D
- PP003** **Threshold Voltage Hysteresis in Compact Models of SiC-MOSFETs**
Qing Sun, Paul Sochor, Andreas Hürner, Rudolf Elpelt, Infineon Technologies, D
- PP004** **Towards a Common Mode Free Packaging Solution for High Voltage Series Connected SiC MOSFET Switches**
Cédric Mathieu de Vienne, Cyril Buttay, Laboratory Ampère, Martin Guillet, Bruno Lefebvre, Hygo Reynes, Besar Asllani, SuperGrid Institute, F; Pierre-Olivier Jeannin, Pierre Lefranc, G2ELab, Till Huesgen, Amin Salim Obaid Al-Hinaai, University of Applied Sciences and Arts Kempten, D
- PP005** **Degradation Pattern of Parallel Symmetrical and Asymmetrical Double-Trench SiC MOSFETs under Repetitive Short Circuits**
Renze Yu, Saeed Jahdi, Juefei Yang, Phil Mellor, University of Bristol, GB; Jose Ortiz-Gonzalez, Olayiwola Alatise, University of Warwick, GB
- PP006** **SiC Power Device Competitive Landscape: A Patent Perspective**
Remi Comyn, KNOWMADE, D
- PP007** **Characterization of the Static and Dynamic Behavior of a 1.2kV SiC JFET in Reverse Conduction**
Tim Ringelmann, Mark-M. Bakran, University of Bayreuth, D
- PP008** **Aging of SiC MOSFETS Through Multistep Voltage Gate Switching Stress**
Jorge Mari, Andreas List, Michael Kirner, Semikron Danfoss, D; Adam Barkley, Philip Butler, Amy Romero, Enes Ugur, Jeff Casady, Wolfspeed, USA;

Packaging for SiC Devices

- PP009** **New XHP 2 Module using 3.3kV CoolSiC MOSFET and .XT Technology**
Matthias Buerger, Karl-Heinz Hoppe, Konrad Schraml, André Wedi Infineon Technologies, D
- PP010** **Evaluation of Next Generation MV SiC Power Modules**
Calvin Flack, Brian Deboi, Christopher New, Andy Lemmon, Sergio Jimenez, Jared Helton, University of Alabama, USA

- PP011** **ISOPLUS - SMPD: An Advanced Isolated Packaging to Fully Exploit the Advantages of SiC MOSFETs**
Aalok Bhatt, Francois Perraud, Martin Schulz, Littelfuse Europe, D;
Umme Kulsoom, Levi Gant, Littelfuse, USA
- PP012** **Characterization of 6.5 kV SiC MOSFETs with and without an Integrated On-Chip Schottky Diode**
Nicholas Baker, University of Alabama, USA
- PP013** **Efficient and Optimized Traction Converter System Enabled by the New 3.3kV CoolSiC .XT Mosfet in XHP 2 Package**
Vishal Jadhav, Jens Czichon, Matthias Bürger, Infineon Technologies, D
- PP014** **Advanced PKG Technology for SiC in the NX Package**
Ryo Goto, Yuji Miyazaki, Mitsubishi Electric, J; Eric Motto, Mitsubishi Electric, USA; Narender Lashmanan, Masuda Koichi, Mitsubishi Electric, D
- PP015** **Analysis of Moisture-Induced Void Formations within Silicon Carbide Power Modules**
Felix Fraas, Blake W. Nelson, Austin Curbow, Paul Kanatzar, Brian DeBoi, Ty McNutt, Wolfspeed, D
- PP016** **Investigation to Improve Reliability of Substrates having Low Thermal Resistance using thicker Cu Circuit Layer**
Fumiaki Ishikawa, Sotaro Oi, Mitsubishi Materials, J
- Reliability I**
- PP017** **Manufacturing Method of Copper Nanowired Interconnections for Embedding Power Dies in PCB**
Caio Cesar De Oliveira Mendes, Julien Morand, Mitsubishi Electric, F;
Jean-Pascal Cambronne, University Paul Sabatie, F
- PP018** **Power Cycling test of PCB-Embedded Power Packaging**
Mickael Petit, Said Bensebaa, Stéphane Lefebvre, Mounira Bouarroudj, CNAM - SATIE, F
- PP019** **Analysis of Tandem Diodes Solutions for Power Modules in Motor Drives Applications**
Tiago Jappe, Matthias Tauer, Vincotech, D;
Zoltan Major, Vincotech, Hungária, H
- PP020** **Influence of Humidity on Thermal Resistance of Power Devices**
Erping Deng, Yanhao Wang, Lixin Wu, Yuxing Yan, Yongzhang Huang, Luhong Xie, North China Electric Power University, CN
- PP021** **Switch Mode Power Cycling Test of Silicon Carbide MOSFETs using Repetitive Avalanche for Heat Generation**
James Abuogo, Thomas Basler, Josef Lutz, Christian Schwabe, Chemnitz University of Technology, D

- PP022** **In-Situ Wire Bond Lift-Off Detection in Three-Phase Inverters based on Magnetic Field Profiling**
Haosu Huai, Egemen Oez, Jürgen Wilde, Pranay Jain,
University of Freiburg, D
- PP023** **Influence of Testing Parameters on the Failure Mechanism of Power Modules During Active Power Cycling Test**
David Strahringer, Jürgen Wilde, University of Freiburg, D
- PP024** **Potentials of Condition Monitoring for Automotive SiC Traction Inverters**
Nikolay Korshunov, Thomas Orlik, Heiko Rabba, Michael Maiworm, IAV, D
- E-Mobility in Transportation**
- PP025** **Optimization of Sets of Semiconductor Power Modules for Paralleling in High Power Converters**
Stefan Schönewolf, Siemens Mobility, D
- PP027** **Magnetic Optimization for Three-Phase LLC Converters**
Daniel Ríos Linares, Alberto Delgado Exposito, Miroslav Vasic, UPM, E
- PP028** **Co-Design and Prototyping of a Wide Bandgap-based Two-Level Inverter for Variable Speed Electrical Propulsion Drives**
Svetomir Stevic, Kay Hameyer, Benedikt Groschup, Sebastian Mönninghoff,
RWTH Aachen University, D; David Franck, CirQua, D
- PP029** **Design of a Fast Switching 200 kVA SiC Drive Inverter for Aviation Application**
Dennis Wöhrle, Cornelius Armbruster, Christian Schöner, Nicolas Vollmar,
Fraunhofer ISE, D
- PP030** **Characterization of a High Voltage Power Net in a Heavy Duty Fuel Cell Truck with Focus on Current Ripples**
Yavuz Gürlek, Roland Dold, Martin Ackerl, Daimler Truck, D; Thomas Basler,
Chemnitz University of Technology, D; Martin Neuburger, University of
Applied Sciences Esslingen, D; Hongyu Xu, Daimler Truck, CHN
- PP031** **Modeling of the Drive Train and Energy Management Strategy for a Hybrid Midsize Multifunctional Vehicle**
Vasken Ketchedjian, André Haspel, Jörg Roth-Stielow, Johannes Schuster,
University of Stuttgart, D
- PP032** **Quasi-Static Approach for Mass Estimation of Electric Propelled Vehicles**
Marius Miller, Markus Pfeil, Benedikt Reick,
Ravensburg-Weingarten University of Applied Sciences, D;
Ralph Kennel, Technical University of Munich, D
- PP033** **A Comparison of GaN HEMT and SiC MOSFET Power Inverter Modules for Electric Vehicles (EV)**
Dominik Nehmer, Mark-M. Bakran, University of Bayreuth, D;

Maximilian Hepp, Wolfgang Wondrak, Mercedes-Benz, D

Power Electronics for Electric Cars I

- PP034** **Mitigation of PWM-Induced Losses in Electric Machines Using Multi-Level Converters**
Anand Krishnamurthy Iyer, Marald Otten, Jeroen Goudswaard, Lightyear, NL
- PP035** **Microcontroller Based Closed Control Loop Asynchronous Boost Converter Exploiting Sti2GaN IC**
Federica Cammarata, Giuseppe D'Agata, Filippo Scrimizzi, STMicroelectronics, I
- PP036** **Performance Enhancement of a SiC Power Semiconductor Module**
Steffen Beushausen, Nisar Ahmed Khan, Jonas Hunka, Ho Tran Ngoc, Alexander Kaiser, Robert Bosch, D
- PP037** **Reducing the Battery Current Ripple in EVs with Discontinuous Pulse Patterns**
Marius Gentejohann, Sibylle Dieckerhoff, Michael Schlüter, Technical University of Berlin, D
- PP038** **GaN-Based Multiphase Drive for Electric Vehicles**
Ander Avila del Pozo, Manex Gondat, Amaia Lopez de Heredia, Maitane Carrasco, Ikerlan, E; Gaizka Almandoz, University of Mondragon, E;
- PP039** **High Performance GaN Inverter for High-Speed Application**
Jordan Sorge, Bernd Eckardt, Maximilian Hofmann, Xinjun Liu, Fraunhofer IISB, D
- PP040** **A Novel Approach to Suppress Self-Excited Oscillations in SiC-Based Power Modules**
Muhammad Muneeb Alam, Steffen Beushausen, Saad Khalid, Ngoc Ho Tran, Robert Bosch, D
- PP042** **GaN-based High Frequency High Power Density 2-in-1 Bidirectional OBCM Design for EV Application**
Minli Jia, Hao Sun, Navitas, CHN
- Gate Drivers**
- PP043** **An Active Gate Driver for Simultaneous Transient and Steady-State Currents Balancing for Silicon Carbide Power Modules in Parallel**
Ahmed Ismail, Nan Lin, Yue Zhao, Ahmad Al-Hmoud, University of Arkansas, USA
- PP044** **A New Resistive Adaptive Gate-Driving Concept with Automated Identification of Operational Parameters**
Philipp Swoboda, Matthias Brodatzki, Marc Hiller, Karlsruhe Institute of Technology, D; Johannes Kolb, Andreas Humbert, Schaeffler Technologies, D

- PP045** **Current Adjustable Gate Drive IC with Propagation Delay Reduction Technique for High-Speed Power Transistors**
Hideaki Majima, Fumi Moritsuka, Katsuyuki Ikeuchi, Yuichi Sawahara, Toshiyuki Ogawa, Osamu Watanabe, Toshiba Electronic Devices & Storage, J
- PP046** **Universal Isolated Gate Driving Platform for 650 V GaN HEMTs Half-Bridge with Dead-Time Control and Integrated Bias Supply**
Diogo Varajao, Infineon Technologies, D; Carmen Menditti Matrisciano, Antonello Laneve, Infineon Technologies, A
- PP047** **A Variable Gate Resistance SiC MOSFET Driver Network to Mitigate Overshoot and Parasitic Ringing**
Vin Loong Choo, Martin Pfof, TU Dortmund University, D
- PP048** **Advantages of Synchronous Bootstrap Methods Over Conventional Methods to Prevent Bootstrap Overcharge in GaN Drivers**
Alexander Mazany, Texas Instruments, USA
- PP049** **Design and Analysis of a Voltage Controlled Current Source Gate Driver for IGBT**
Alexander Leandro Quispe Parillo, Martin Foster, David Stone, University of Sheffield, GB
- PP050** **Gate-Driver Design and Optimization in Power Converters**
Jan Hammer, Martin Ordonez, University of British Columbia, CDN; Emanuel Serban, Juergen Wassmuth, Enersy, CDN
- Power Converters I**
- PP051** **Resonant Multiport Converter with High Interconnection Capability and Lower Parameter Deviations**
Fabian Groom, Thiago Pereira, Marco Liserre, University of Applied Sciences Kiel, D; Sergej Schikowski, Dario Metschies, Reese+Techware Industrieelektronik, D
- PP052** **Thermal Management of a Compact High Power Factor Air Cooled Isolated 12kW 9 Litre SiC Three-Phase AC-DC Converter**
Jean Carlo Da Cunha, Luis De Sousa, Radko Vykukal, Traco Power, IRL
- PP053** **A General Analytical Approach for the Analysis of Filter Circuits Regarding Conducted Voltage and Current Emissions**
Marcel Gladen, Louay Hito, WILLO, D; Simon Johannliemke-Appelbaum, R Volker Staudt, Ruhr University Bochum, D
- PP054** **32-Stage Semiconductor-Based Marx Modulator with Resonant Charging**
Martin Sack, Johannes Ruf, Dennis Herzog, Georg Müller, Karlsruhe Institute of Technology, D

- PP055** **A Dual Output Discontinuous Conduction Mode SEPIC with Integrated Boost DC-DC Converter**
Ben Stainthorpe, Mohamed Dahidah, Volker Pickert,
Newcastle University, GB
- PP056** **Considerations for Mitigating False Triggering of a Truly Differential Input Gate Driver for 1.2kV SiC MOSFETs**
Jesi Miranda, Qiang Li, Christina DiMarino, Xingyu Chen, Jack Knoll,
CPES, USA
- PP057** **Rotor Position Extraction of Dual Induction Motors at High Loads using Intermodulation Saliency**
Markus Vogelsberger, Alstom Austria, A; Hans Ertl, Eduardo Rodriguez
Montero, Thomas Wolbank, Vienna University of Technology, A; Wolfram
Teppan, LEM, CH
- Measurement Methods**
- PP058** **Layout Considerations for a New Current Sensing Circuit for Online Lifetime Prediction of SiC MOSFETs**
Yusuke Kubo, Seiya Kitagawa, ROHM Semiconductor, J
- PP059** **Reconfigurable Double Pulse Test Setup for Si and Wide Bandgap Power FETs**
Madhat Alimawi, Ray Hueting, Patrick Koch, Prasanth Venugopal,
University of Twente, NL
- PP060** **Conceptual Design of a Portable Measuring Box for Monitoring Ripple Currents Affecting the Lifetime of Electrolytic Capacitors in Industrial Open DC Grids**
Jan-Niklas Koch, Simon Puls, Holger Borcharding, Slavi Warkentin,
University of Applied Sciences and Arts Ostwestfalen-Lippe, D
- PP061** **Current Measurement Comparison for SiC MOSFET Modules**
Yusi Liu, Steven Hong, Onsemi, USA
- PP062** **Impedance Analysis in Power Electronic Systems with Spectral Estimation**
Tobias Haas, Ansgar Ackva, Bernd Dreßel, Julian Endres, Andreas Wist
University of Applied Sciences Würzburg-Schweinfurt, D;
Matthias Friedrich, Fulda University of Applied Sciences, D
- PP063** **A Fully Integrated LEM Nano Current Sensor for DCM Platform for High Power Density EV-Applications**
Fabio Carastro, Thomas Zöls, Semikron Danfoss, D; Dylan Cerutti,
Damien Coutellier, Arnaud Labbe, Sofiane Serbouh, LEM Europe, D
- PP064** **Inverter-Integrated Acquisition of the Current Through the DC-Link Based on the Measured DC-Link Voltage**
Joschka Randerath, Jens Onno Krahe, Cologne University of Applied
Sciences, D; Joachim Holtz, University of Wuppertal, D

PP065 **Design of a 2 kA Pulsed Current Source for Characterization of Current Sensors**
Philipp Ziegler, Abbas Al-Hussainy, Jörg Haarer, Philipp Marx,
Jörg Roth-Stielow, University of Stuttgart, D

Power Converters and Measurement Methods

PP066 **MMC Thermal Measurements on Floating Potential using an Arduino-Based Distributed and Wireless IoT Sensor System**
Julian Lange, Christian Herrmann, Markus Schröder, Siemens Energy Global, D; Christian Degen, Technical University Nürnberg, D

PP067 **Design of an Easy-to-Use Standalone PD Measurement System for Pulsed Voltage and High dV/dt Setups**
Markus Fürst, Mark-M. Bakran, University of Bayreuth, D

PP068 **High-Frequency Voltage and Current Probes for Measurement at Distance with an Oscilloscope**
Julien Chauvin, Philippe Azais, Daniel Chatroux, Laurent Garnier, Remi Vincent, CEA, F

PP069 **Utterly Simple and Economical Bus Capacitors Pre-Charger Based on a Unique 'Floating Integrator'**
Sam Ben-Yaakov, Ben-Gurion University, IL; Oded Arlevski, Paul Price, Yivgeni Semidotskih, IRP Systems, IL

PP070 **A Novel Application in Overhead Power Lines of Wireless Self-Powered Monitoring System for Early Detection of Forest Fires**
Antonio-Miguel Muñoz-Gómez, Jesus Muñoz-Cruzado Alba, CIRCE, E; José Francisco Sanz Osorio, Zaragoza University, E

PP071 **Embedded Current Sensor for SiC Die Current Measurement**
Janus Meinert, Szymon Beczkowski, Pawel Piotr Kubulus, Stig Munk-Nielsen, Asger Bjorn Jorgensen, University of Aalborg, DK

PP072 **Mixed Critical Resolver to Digital Conversion for Safety-Related Servo Drive Applications**
Tobias Schmidt, Jens Onno Krahn, Cologne University of Applied Sciences, D; Joachim Holtz, University of Wuppertal, D

PP073 **Improving a Machine Set Based Controller for Grid Side Power Converter Applications**
Steffen Menzel, Alexander Ernst, Wilfried Holzke, Bernd Orlik, Holger Raffel, René Reimann, University of Bremen, D

PP074 **Optimized Tuning of Controllers Considering Different VSI Four-Wire Converters in Autonomous Microgrids**
Sergio Augusto Oliveira da Silva, Bruno Costa,
Federal University of Technology – Paraná, BR

Passive Components

- PP075** **High Temperature Capacitor Films with Reduced Dissipation Losses for High Voltage AC-DC Inverters**
Adel Bastawros, Matt Buratto, Pat Flanagan, Christopher Grabowski, Andrew Pingitore, SABIC, USA
- PP076** **Improved Magnetic Devices for Battery Inverter Systems with a High Power-to-Weight Ratio**
Manfred Wohlstreicher, Manfred Wohlstreicher, SUMIDA Components and Modules, D
- PP077** **A Novel Test Setup for Arbitrary PWM Converter Excitations of Nonlinear Inductors**
Jeremias Kaiser, Calvin Au, Thomas Dürbaum, Benedikt Kohlhepp, Friedrich-Alexander-University Erlangen-Nuremberg, D
- PP078** **Experimental Analysis of the Temperature Dependency of an Orthogonal Field-Coupled Current Controlled Adjustable Inductance**
Guido Schierle, Klaus F. Hoffmann, Michael Meissner, Hendrik Saß, Helmut Schmidt University, D
- PP079** **High Frequency Model with Ohmic Behave of a Three-Phase Coil**
Andreas Wist, Ansgar Ackva, Bernd Dreßel, Tobias Haas, University of Applied Sciences Wuerzburg-Schweinfurt, D
- PP080** **Stress Testbench for Two-Phase Interleaved Coupled Inductors in Three-Level Inverters using Cascaded Control**
Valentin Wagner, Christian P. Dick, Lukas Geiger, Cologne University of Applied Sciences, D
- PP081** **Analytical Model for Considering the Magnetic Anisotropy of the Inductance and Core Losses of Passive Magnetic Components**
Michael Owzareck, Sascha Langfermann, Lukas Fräger, Dennis Kampen, BLOCK Transformatoren-Elektronik, D
- PP082** **Integration of High Leakage Inductance to HFHP Transformer in High Power Converters Vs the Use of a Discrete Inductor**
Kapila Warnakulasuriya, Mark Pavier, Infineon Technologies Reigate, GB; Marcus J. Kastner, Infineon Technologies, D

Packaging and Integration

- PP083** **Top Side Cooling Packages: Disrupting Technology to Boost Power Density and Performances in High-End Power Conversion Systems**
Daniela Cavallaro, Marco Papasero, Cristiano Gianluca Stella, Stefano Orlando, Ludovica Longo, Giuseppe Sorrentino, STMicroelectronics, I; Domenico Nardo, STMicroelectronics, D
- PP084** **Reliability and Thermal Analysis of ACEPACK SMIT Power Module**
Davide Maria Amoroso, Gaetano Sequenzia, University of Catania, I; Giuseppe Mauromicale, Michele Calabretta, Angelo Alberto Messina, Alessandro Sitta, STMicroelectronics, I; Giuseppe D'Arrigo, CNR - IMM, I

- PP085** **Epoxy Molding Compound Adhesion Analysis on Copper and Nickel Surfaces Using In-Situ Button Shear Method**
Andris Avots, David Guillon, Katrin Schlegel, Hitachi Energy, CH
- PP086** **High Temperature Lead Free Solder for High Power Semiconductor Device Packaging Applications**
Muhammad Morshed, Laxma Reddy Billa, Thomas Grant, Maryam Mat, Yangang Wang, Dynex Semiconductor, GB;
Dean Payne, Indium Corporation, SGP
- PP087** **Material Innovation, Process Development, Reliability & Challenges with Copper Sintered Interconnects for High Power & Optoelectronics Packaging**
Sri Krishna Bhogaraju, Gordon Elger, University of Applied Sciences Ingolstadt, D
- PP088** **Thermal Evaluation of Substrate Technologies Used for Power Peak Management in SSPC Modules**
Guy Scoggin, Rabih Khazaka, Stephane Azzopardi, Cyrille Gautier, Toni Youssef, SAFRAN, F; Yvan Avenas, Jean Luc Schanen, G2elab, F;
Sylvain Muckenhirn, Lesia O'Connor, Fralock, USA
- PP089** **Active Metal Brazed Cu-Si₃N₄ Composites for Power Electronics**
Axel Rost, Sindy Mosch, Jochen Schilm, Nikolai Trofimenko, Paul Gierrh, Fraunhofer IKTS, D
- PP090** **Development of Cu-Cu Joining Technology by Laser Welding for Terminal Attach within Power Semiconductor Package**
Elaheh Arjmand, Thomas Spann, Sonja Madloch, Littelfuse, GB

MOSFETS and Integrated Power Modules

- PP091** **Assessment of MOSFET Switching Losses Based on Junction Temperature. Comparison in an LLC Converter between TO-247 and ACEPACK SMIT Using MDmesh DM6 Technology.**
Alfio Scuto, Gaetano Berverde, Giuseppe Sorrentino, Marco Ventimiglia, STMicroelectronics, I; Giuseppe Lullo, University of Palermo, I;
Gianpaolo Vitale, ICAR-CNR, I; Domenico Nardo, STMicroelectronics, D
- PP092** **The Next Step in Power MOSFET Technology Enables Further Increase in Power Supply Efficiencies**
Simone Mazzer, Cesar Augusto Braz, Ralf Siemieniec, David Laforet, Elias Pree, Alessandro Ferrara, Infineon Technologies, A
- PP093** **A Heterogeneously Integrated Double-Sided Cooled Power Module for Electric Vehicles**
Ahmed Ismail, Asif Faruque, H. Alan Mantooh, Riya Paul, Sudarshan Chinnaiyan, University of Arkansas, USA
- PP094** **Introducing the New 600 V CIPOSTM Tiny IM323 Intelligent Power Module for Motor Drive Applications**
Kihyun Lee, David Jo, Taejin Lee, BK Song, Infineon Technologies, ROK

- PP095** **New SMD-IPM: Explore How to Make Low-Power Inverter Design More Compact and Cost-Efficient**
Jong-Mu Lee, Bum-seok Suh, Jun-Ho Lee, Jintae Kim, Alpha and Omega Semiconductor, ROK; Alex Niu, Alpha and Omega Semiconductor, USA; Heng Lee, Alpha and Omega Semiconductor, TW
- PP096** **Utilization of SiC Integrated Power Device Towards Enhanced Power Density and Energy Efficient Consumer Drives Applications**
Konstantinos Patmanidis, Infineon Technologies, A; Stefano Ruzza, Claudio Villani, Infineon Technologies, I
- PP097** **Development of Enhanced RC-IGBT Based Intelligent Power Module for Home Appliance Application**
Taesung Kwon, Jaewook Lee, Sungmo Young, Minsub Lee, Junbae Lee, Daewoong Chung, Youngkil Cha, Infineon Technologies, ROK
- PP098** **Online Monitoring Approach of a SiC Power Semiconductor using Turn-Off Delay during Operation**
Victor Golev, Rando Raßmann, Ulf Schümann, University of Applied Sciences Kiel, D

SiC Devices II

- PP099** **Characterizing the Stability Limits of 1.2 kV SiC MOSFET Body Diodes Under Hard Switching**
Mohammed Amer Karout, Mohamed Taha, Olayiwola Alatise, Philip Mawby, Jose Ortiz Gonzalez, Ayala Heaklig, Craig Fisher, University of Warwick, GB
- PP100** **Impact of Temperature and Base Bias Stress on the Static Characteristics of Silicon and 4H-SiC NPN Vertical Power BJTs**
Mana Hosseinzadehlish, Saeed Jahdi, Chengjun Shen, Ian Laird, Xibo Yuan, University of Bristol, GB; Olayiwola Alatise, Jose Ortiz Gonzalez, University of Warwick, GB
- PP101** **The Evolution of Commercial SiC FETs, from Planar Gates to Reliable Trench Technology and Towards Superjunction Devices**
Stephen Russell, TechInsights, CDN
- PP102** **Characterization of Constant-Gate-Charge Scaled 4H-SiC Power Mosfets**
Ben Ngu, CPES, USA; Christina DiMarino, Virginia Tech, USA; James Cooper, Sonrisa Research, USA; Dallas Morissette, Madankumar Sampath, University of Purdue, USA
- PP103** **The Impact of Different Test Methodologies for Short-Circuit Ruggedness of SiC MOSFETs**
Sara Kochoska, Lukas Richert, onsemi, D; Jaume Roig Guitart, Basil Vlachakis, onsemi, B
- PP104** **Improved Power Cycling Reliability through the use of SmartSiC Engineered Substrate for Power Devices**
Eric Guiot, Frédéric Allibert, SOITEC, F; Jürgen Leib, Tobias Erlbacher, Tom Becker, Fraunhofer IISB, D

PP105

Inter-Chip Oscillation of Paralleled SiC MOSFETs

Florian Sawallich, Hans-Günter Eckel, University of Rostock, D

Reliability II

PP106

Compensation of Long-Term Drift Effects of SiC MOSFETs under Power Cycling Like Gate Conditions

Carsten Kempiaik, Andreas Lindemann, Otto-von-Guericke-University Magdeburg, D

PP107

Reliability Assessment of Latest SiC Chip and Packaging Technology

Sven Thomas, Christophe Fery, Benjamin Fabian, Habib Mustain, Heraeus Germany, D; Amy Romero, Jeffrey Casady, Anri Mikirtichev, Wolfspeed, USA

PP108

Power Cycling SiC MOSFETs: Study of Reliability in Multi-chip Power Modules

Andrew Lemmon, Nicholas Baker, Justin Conzola, Chase Fortin, Vishesh Vikas, University of Alabama, USA

PP109

A Condition Monitoring Method for Solder Layer Degradation of Liquid-Cooled Power Semiconductors

Timm Felix Baumann, Raul Murillo Garcia, Konstantinos Papastergiou, CERN, CH; Dimosthenis Pefititsis, NTNU, N

PP110

Power Cycling of Discrete Devices with Very High Power Density

Patrick Heimler, Thomas Basler, Sören Gesell, Josef Lutz, Kristiane Reiter, Chemnitz University of Technology, D

PP111

Measurement Methods for Water-Uptake of Encapsulation Materials in Power Electronics

Paul Gierth, Sindy Mosch, Jochen Schilm, Nikolai Trofimenko, Paul Gierth Fraunhofer IKTS, D

PP112

Identifying Superimposed Degradation Effects in Power Electronic Modules

Isabel Austrup, Tianlong Albert, Rik De Doncker, Christoph van der Broeck, RWTH, Aachen University, D

Control Techniques in Electrical Drives

PP113

A Method of Synchronizing with DUT to Improve the Stability and Accuracy of Power Hardware-In-the-Loop Simulator

Jangmok Kim, Pusan National University, ROK; Seon Woong Hwang, Hyeong-Do Kang, Dong-Youn Kim, Hyonwon Power Tech, ROK

PP114

Advanced Circuitual Model for e-Drive Simulation, including Harmonic Effects and Fault Scenarios

Andrei Bojoi, Gianmario Pellegrino, Simone Ferrari, Paolo Pescetto, Politecnico di Torino, I

PP115

Recurrence Plot Analysis Applied To Power Electronics Systems

Lincoln Oliveira, Fernando Luiz Marcelo Antunes, Demercil Oliveira Humberto Monte, Federal University of Ceara, BR; Esio Eloi dos Santos Filho, Federal

University of Santa Catarina, BR; Josep M. Guerrero, Juan C. Vasquez, Aalborg University, DK; Marcelo Lobo Heldwein, Technical University of Munich, D

- PP116** **Utilization of Least Squares Algorithm for Online Identification of Foster Thermal Network Parameters**
Martin Votava, Yoann Pascal, Fraunhofer ISIT, D; Marco Liserre, Christian-Albrechts-University of Kiel, D; Zdenek Peroutka, University of West Bohemia, CZ
- PP117** **Parameters Identification for Control Tuning with Offline Methods for Permanent Magnet Synchronous Machines**
Oriol Subirats Rillo, Carlos Miguel-Espinar, Daniel Montesinos-Miracle, CITCEA-UPC, E
- PP118** **Parameter Sensitivity Assessment for Model-Based Sensorless Control of Synchronous Machines in Automotive Applications**
Robert Nelles, Porsche, D; Joao Bonifacio, ZF Friedrichshafen, D
- PP119** **DQ-Sensor-Less Control Implementation on a Multi-Phase High-Speed Direct Drive Motor**
Maurizio Incurvati, Martin Schiestl, MCI The Entrepreneurial University, A; Ronald Stärz, Infineon Technologies AG Austria
- PP120** **Position Control of External Rotor Permanent Magnet Synchronous Motor**
Goksel Kizir, A. Furkan Kanburoglu, Murat Yilmaz, Roketsan, TR

Power Electronics for Electric Cars II

- PP121** **Relevance and Range Benefit of Wide Bandgap Power Semiconductors in Autonomous Battery Electric Vehicles**
Marco Denk, Georg Arbeiter, University of Applied Sciences Coburg, D; Stefan Hain, Fabian Hohmann, ZF Friedrichshafen, D
- PP122** **Latest Generation of EMI Suppression (Film) Capacitors for xEV Systems**
David Olalla, Felipe Oliveira, TDK Electronics, D
- PP123** **Automated Design of Traction Inverter to Achieve Optimal Performances Over the Whole Driving Cycle of an Electrical Vehicle**
Timothé Delaforge, Sebastien Mariethoz, Bern University of Applied Sciences CH; Kooros Moabber, Volvocars, S
- PP124** **SiC-Based Auxiliary E-Fuse Technology Demonstrator for EV Application**
Ehab Tarmoom, Steven Chenetz, Dennis Meyer, Xuning Zhang, Kevin Speer, Orlando Esparza, Microchip Technology, USA
- PP125** **Design of a Four-limb Coupled Inductor for a Three-phase Six-switched Boost PFC Converter for EV Application**
Kelly Ribeiro de Faria, Larbi Bendani, Nadjib Bouzidi, VALEO, F
- PP126** **Advantage of Lead-Frame Wiring and High Reliable to Electromigration Package for High Power Density Automotive Power Module**
Yushi Sato, Shinichiro Adachi, Hiromichi Gohara, Nobuhiro Higashi, Souichi Yoshida, Fuji Electric, J; Steffen Ewald, Fuji Electric Europe, D

- PP026** **Characterization and System Benefits of Using 3.3 kV All-SiC MOSFET Modules in MV Power Converter Applications**
Ahmed Ismail, Ahmad Al-Hmoud, Yue Zhao, University of Arkansas, USA
Ashish Kumar, Kraig Olejniczak, Wolfspeed, USA

Charging Technologies I

- PP127** **Multiport Type-C & PD Charger Topology and Control Methodologies**
Chuan-Yu Lin, Infineon Technologies, USA
- PP128** **Tiny Power Box - Mechanical Investigations for Automotive Very High Power Density Onboard Chargers**
Ismail Recepti, Christian Mentin, Philip Matzick, Silicon Austria Labs, A;
Rafael Garcia, Infineon Technologies, A
- PP129** **Medium Voltage Series Resonant Dual-Active-Bridge DC-DC Converter for EV Charging System with Bipolar DC-link**
Przemyslaw Trochimiuk, Rafal Miskiewicz, Jacek Rabkowski, Warsaw University of Technology, PL; Kaushik Naresh Kumar, Dimosthenis Peftitsis, Norwegian University of Science and Technology, N
- PP130** **Increasing Power Transfer Capability of Wireless Battery Charger Under Misalignment Conditions**
Nikola Mirkovic, Alberto Delgado Expósito, Miroslav Vasic, Pedro Alou Cervera, Polytechnic University of Madrid, E
- PP131** **Increasing the Power Density of Bidirectional On-Board Chargers with a New Silicon Carbide Power Module**
Marija Jankovic, Imane Fouaide, ROHM Semiconductor, D; Tan Hoang, Kondo Masahito, ROHM Semiconductor, J
- PP132** **Investigation of Ripple Minimization in Asymmetric Interleaved Boost Converters for Vehicle-Integrated Photovoltaics (VIPV) Applications**
Ozturk Sahin Alemdar, ODTU-GUNAM, TR; Ogun Altun, Ozan Keysan, Middle East Technical University, TR
- PP133** **Advanced Synchronous Rectification for an IGBT-Based ZCS LLC Converter with High Output Currents for a 2 kW Automotive DC-DC Stage**
Daniel Urbaneck, Joachim Böcker, Frank Schafmeister, University of Paderborn, D
- PP134** **Analysis of WBG based hybrid semiconductors approach for bidirectional PFC in On-board charger applications**
Giuseppe Aiello, Francesco Gennaro, STMicroelectronics, I;
Domenico Nardo, STMicroelectronics, D

Control Methods I

- PP135** **Adaptive Control Methods for an Auxiliary Resonant Commutated Pole Inverter**
Markus Zocher, Norbert Grass, Nuremberg Institute of Technology, D;
Ralph Kennel, Technical University of Munich, D
- PP136** **Modeling and Control of a Decoupled Hybrid-Fed Multi-Active Bridge (MAB) converter**
Rebecca Tarraf, Baptiste Morel, Sylvain Leirens, Sebastien Carcouet,
Xavier Maynard CEA, F; Yves Lembeye, David Frey G2elab, F
- PP137** **Stability Enhancement and Power Flow Control for Lunar DC Microgrid with WBG based Flexible DC Energy Router**
Nihanth Adina, Pengyu Fu, Hadiul Islam, Yifan Shi, Jin Wang, Yuzhou Yao,
Zhining Zhang, The Ohio State University, USA
- PP138** **Current Limiting Method for Voltage Source Grid-Forming Inverters**
Alvaro Morales-Munoz, Francisco Freijedo,
Huawei Nuremberg Research Center, D; Sante Pugliese, Marco Liserre,
University of Kiel, D
- PP139** **Digital Control for Efficient Switching Over a Wide Range of Supply Voltages**
Dominique Bergogne, Plinio Bau, Sebastian Gaviria-Duque, Srivathsan Hariharan,
Wise-Integration, F
- PP140** **Optimized Pulse Patterns for Salient Permanent Magnet Synchronous Machines Considering Nonlinear Magnetic Effects**
Maximilian Hepp, Michael Saur, Wolfgang Wondrak, Mercedes-Benz, D;
Mark-M. Bakran, University of Bayreuth, D;
- PP141** **Sliding Carrier SPWM for Voltage Balancing in Multilevel Inverters**
Mehdi Zarei Tazehkand, Mehdi Baghdadi, University College London, GB
- Power Converters II**
- PP142** **Switching Losses Estimation Considering Device Parasitics in SiC-Based Industrial Induction Heaters**
Fernando González-Hernando, Amaiur Mendi-Altube, Irma Villar, Ikerlan, E;
Jesús Acero, Claudio Carretero, University of Zaragoza, E;
- PP143** **Effects of the DC-Link Voltage on the Efficiency of a 3.3kV-Si-SiC-Topology-Hybrid-Switch**
Michael Meissner, Klaus F. Hoffmann, Helmut-Schmidt-University, D
- PP144** **Experimental Evaluation and Analysis of Switching Losses for an Active Snubber Cell for High-Power Interleaved Boost Converters**
Sebastian Sprunck, Gholamreza Tabrizi, Matthias Klee, Fraunhofer IEE, D;
Marco Jung, University of Applied Sciences Bonn-Rhein-Sieg, D
- PP145** **Low Drop-out COT Buck Converter with Internal Compensation w/o Maximum Duty Cycle Limitation due to Minimum Off-Time**
Adalberto Mariani, Massimiliano Gobbi, STMicroelectronics, I

- PP146** **Analytic Performance Analysis and Efficiency Model for Inverters at Imbalanced Operation**
Lukas Fräger, Sascha Langfermann, Michael Owzareck, Dennis Kampen Block
Transformatoren-Elektronik, D; Jens Friebe, Leibniz University Hannover, D
- PP147** **Solid-State Transformers for DC-AC Hybrid Grids: a Case Study of TIGON Project**
Jesús Muñoz-Cruzado Alba, José Ignacio Abad, David Cervero, Eduardo García-Martínez, Rubén González Fernández, CIRCE, E; Oscar Izquierdo, CEDER-CEIMAT, E; Antonio Rojas, PREMO, E
- Multilevel Converter**
- PP148** **Comparison of 3-Level and 2-Level Topologies for Energy Storage Applications with the New Generation IGBT7**
Alexander Philippou, Christian Müller, Varun Raghunath, Franz-Josef Niedernostheide, Infineon Technologies, D; Young Kil Cha, Gun Ho Lee, Infineon Technologies, ROK
- PP149** **Derived Electrical Requirements from the Harmonized Standards and Norms for Electric Vehicle Charging Safety**
Tobias Högerl, Andreas Wiedenmann, Wolfgang Grupp, Anton Lesnicar, Nina Sorokina, Thomas Weyh, Universität der Bundeswehr München, D;
Andreas Hauser, VDE Renewables, SGP; Manuel Kuder, BAVERTIS, D
- PP150** **Development of a VCE-Measurement Board for Medium-Voltage Modular Multilevel Converter**
Joao Victor Farias, Fraunhofer ISIT, D; Luis Camurca, Robert Bosch, D;
Marco Liserre, Christian-Albrechts-University of Kiel, D
- PP151** **Working Principle, Simulation and Measurement Results of a Novel Hybrid Cascaded H-Bridge Inverter for STATCOM and AHF Purposes**
Niklas Krug, Marek Galek, University of Applied Sciences Munich, D;
Dietmar Fehrenbach, Helmut Schmidt University, D
- PP152** **Utilizing Dual Active Bridges to Integrate Battery Storage Systems into Medium Voltage MMC STATCOMs - A Feasibility Study**
Simon Puteanus, Steffen Bernet, Technical University of Dresden, D;
Caroline Stackler, Bernd Niemand, Siemens Energy, D
- Modelling and Simulation**
- PP153** **Understanding the Impact on Parasitic Probing Effects onto the PCB Power-to-Control Crosstalk in Switch-Mode Power Supplies**
Jay Carpenter, Steven Lee, Hanqing Wen, Keysight Technologies, USA;
Simon Muff, Keysight Technologies, D; Giulia DiCapua, University of Cassino and Southern Lazio, I; Nicola Femia, University of Salerno, I
- PP154** **Reduction of SiC-MOSFET Switching Oscillations during Double Pulse Measurements**
Simon Podendorf, Kai-Uwe Rathjen, Norman Landskron, Sönke Brandt,
Stefan Dickmann, Klaus F. Hoffmann, Helmut-Schmidt-University, D

- PP155** **A Modelling Approach Towards High Power Module Design**
Roveendra Paul, James Victory, Leon Zhang, ON Semiconductor, USA;
Rajani Thirukoluri, ON Semiconductor Germany, D
- PP156** **Computational Efficiency Analysis of a Compact Behavioral SiC SPICE Model**
Blake Nelson, Brian DeBoi, Ty McNutt, Austin Curbow, Wolfspeed Inc., USA;
Andrew N. Lemmon, The University of Alabama, USA
- PP157** **SiC Power Modules for Automotive Traction Inverters: a Fully Integrated Electromagnetic-Thermal Modeling Methodology for the Estimation Dynamic of Busbar Heating**
Daniela Cavallaro, Ludovica Longo, Marco Papasero, STMicroelectronics, I
- PP158** **Busbar Optimization Design for Low Parasitic Inductance SiC Power Module**
Wenbo Wang, Anne Harris, Yangang Wang, Dynex Semiconductor, GB
- PP159** **Fidelity Assessment of Real-Time Simulation for High-Frequency Resonant Converter Applications**
Marija Stevic, Ravinder Venugopal, OPAL-RT, D; Luc-Andre Gregoire, Sebastien Cense, Opal-RT Technologies, CAN; Sumantra Bhattacharya, Josef Kallo, H2FLY, D
- PP161** **Comparison of AC Common-Mode Filter Topologies through SPICE Simulations**
Maurizio Tranchero, Paolo Santero, Ideas & Motion, I

Passive Components and Transformers

- PP162** **Experimental Verification of Capacitive Power Loss Associated with the Transformer Intrawinding Capacitance**
Claus Kjeldsen, Christian Østergaard, University of Southern Denmark, DK
- PP163** **Using Powder Cores to Increase the Power Density of Flyback Storage Transformers**
Paul Winkler, Bhartindu Kumar Bunny, AnhTuan Luong, Wulf Günther, Acal BFi, D
- PP164** **Hybrid Magnetic Core to Increase Saturation Limit and Magnetizing Inductance in Integrated High Power Transformers**
Daniel Goldmann, Simon Schramm, Jakob Vellinger, University of Applied Sciences Munich, D; Jörg Metzger, Inductive Electronic Components, D
- PP165** **Transformation of Transformer Design with Artificial Intelligence**
Vajira Dhanapala Buckingham Magnetics, GB

Energy Storage and Smart Grid

- PP166** **DC Transformer Impact on Voltage Dynamics in Hybrid AC-DC Power Distribution Networks**

Jules Mace, Renan Pillon Barcelos, Max Dupont, Andrea Cervone, Drazen Dujic, EPFL, CH

PP167 **Measured advantages of a Production Plant with DC Grid in terms of Energy Efficiency, Peak Power Reduction and Power Quality**
Slavi Warkentin, Holger Borcharding, Simon Puls, Technical University of Ostwestfalen-Lippe, D; Frederic Blank, KEBA, D; Simon Riethmüller HOMAG, D

PP168 **Advanced Solid-State-based Protection Scheme for High-Voltage Li-ion Battery Energy Storage System**
Hamzeh Beiranvand, Thiago Pereira, Marco Liserre, Christian-Albrechts-University of Kiel, D

PP169 **Modeling the Influences of Cells Characteristics in Energy Storage System for Different Forms of Discharge Current**
Dimitar Arnaudov, Hristiyan Kanchev, Vladimir Dimitrov, Krasimir Kishkin, Technical University of Sofia, BG

PP170 **The Dependency of 18650 Lithium Ion Batteries Characteristics on Temperature**
Ali Mashayekh, Julian Estaller, Mahdiye Khorasani, Manuel Kuderer, Richard Eckerle, Thomas Weyh, Universität der Bundeswehr München, D

PP171 **Evaluating SiC-MOSFETs and Si-IGBTs as Self-Protected Battery Disconnect switch in MW-Capable Battery Applications**
Martin Schulz, Muhammad Yassof, Littelfuse, D; Cesar Martinez, Littelfuse, ES

PP172 **Development of an Educational Li-ion Battery Test Bench for Engineering Students**
Simon Ravyts, Jan Cappelle, Pjotr Vande Velde, Cedric Lecluyse, KU Leuven, B

Modelling and Digital Twining

PP173 **Digital Twin Approach for Accurate System-Level Simulation of Wide-Bandgap Power-Semiconductors using Temperature Dependent Parameters**
Oleksandr Solomakha, Kevin Muñoz Barón, Ingmar Kallfass, University of Stuttgart, D

PP174 **Development and Evaluation of a Model for the Implementation of a Digital Twin for a Wind Turbine**
René Reimann, Steffen Menzel, Wilfried Holzke, Bernd Orlik, Holger Raffel, University of Bremen, D

PP175 **Flexible and Cost Effective HiL System for Module Based VSC Simulation - Part III: Continuous Integration of HiL Based MMC Firmware Tests**
Tobias Barth, Adam Walter, Cristian Verdugo, Siemens Energy Global, D

PP176 **Workflow from Psim to Imperix Platform to Implement Digital Control – Method Applied to Prototype a Bidirectional Inverter-Charger for Electrical Vehicle**
Alek Guedegbe, Daniel Chatroux, Laurent Garnier, CEA GRENOBLE, F

- PP177** **Fast and Flexible PCB Parasitic Extraction from Gerber Files for Power Electronics Design Support**
Sven Fießer, Ulf Schwalbe, Technical University of Ilmenau, D
- PP178** **A Novel Approach of Hybrid Behavioral Modelling in Virtual Design Routines and a Survey of Computation Time Reduction**
Markus Mertens, Smart Mechatronics, D; Marcel Gladen, WILO, D;
Marcel Gebing, Tilman Sanders, FH Münster University of Applied Sciences, D
- PP179** **Reduction of Parasitic Effects in PCB Connection Paths to Improve the Switching Performance of GaN eHEMT**
Simon Holzmann, Christian Schumann, Benjamin Zacher,
Kaiserslautern University of Applied Sciences, D
- PP180** **Development of Low-Budget Conductive FDM-Filament for Processing in Commercial Fused-Layer 3D Printers**
Andre Schuhl, Katharina J. Schiffhauer, Ulf Schwalbe,
Fulda University of Applied Sciences, D
- PP181** **Design and Multiphysics Simulation of a PCB-Embedded-Package Enclosing a Gallium Nitride System on Chip Grown on a Novel Substrate**
Abinash Pradhan, Alfred Binder, Nazmul Hasan, Thomas Moldaschl,
Johannes Schicker Silicon Austria Labs, A; Rik W. De Doncker,
RWTH Aachen University, D
- SiC Devices III**
- PP182** **New 1200V eSiC MOSFET in Kelvin Source Package to Maximize Efficiency in xEV and Solar Applications**
Wonsuk Choi, Dongwook Kim, Hongki Kim, Power Master Semiconductor, ROK
- PP183** **Power Loop Parasitics Impact on Paralleled Silicon Carbide MOSFETs**
Emanuela Alfonzetti, Mario Pulvirenti, STMicroelectronics, I;
Santi Agatino Rizzo, Nunzio Salerno, University of Catania, I
- PP184** **Dynamic Characterisation of 1200V-SiC-MOSFETs for High Current Applications in TO247-4-Packages**
Sönke Brandt, Dietmar Fehrenbach, Klaus F. Hoffmann, Michael Meissner,
Martin Rasch, Helmut-Schmidt-University, D; Bernhard Wagner,
Philips Medical Systems DMC, D
- PP185** **Repetitive Dynamic Voltage Clamp for SiC MOSFETs in Half Bridge Converters**
Luciano Salvo, Angelo Sciacca, Fabio Occhipinti, Gionatan Montoro,
Massimo Nania, Mario Pulvirenti, STMicroelectronics, I
- PP186** **Accurate Switching Energy Measurement of Wide Band-Gap Semiconductors at Low Current**
Gustavo Sathler Zappulla, Marco Andrade, Bernardo Cougo,
IRT Saint-Exupéry, F; Lenin M. F. Morais, Federal University of Minas Gerais, BR

- PP187** **Accuracy Improvement to Estimate Power Semiconductor Losses Using Opposition Method**
Tien Anh Nguyen, Denis Labrousse, Stephane Lefebvre, Mickael Petit, Gerard Chaplier, SATIE-CNAM, F
- PP188** **Evaluation of the Static Voltage Distribution Within Super-Cascode Power Modules**
Sergio Jimenez, Andrew Lemmon, The University of Alabama, USA
- Motors**
- PP189** **Integration of Power Electronics into the Stator of an Electrical Machine**
Philipp Marx, Jörg Roth-Stielow, Jonathan Terfurth, Philipp Ziegler, University of Stuttgart, D; Sebastian Körber, Fraunhofer Institute for Chemical Technology, D;
- PP190** **Methodology for the Selection of Optimum Switching Frequency and Modulation Technique for System Power Loss Minimization in Inverter-fed Variable Speed Drives**
Steffen Frei, Maximilian Clauer, Gerd Griepentrog, Technical University of Darmstadt, D
- PP191** **Optimized Integration of a Modular Motor Driver in a Low Voltage High Power, Open Winding Synchronous Machine**
Alexandre Siccardi, Louis Dassonville, Benjamin Coelho Gaspar, Ali Makki, KEEP MOTION, F; Charles Joubert, Christian Martin, Laboratory Ampère, F
- PP192** **Verification of Theoretical Models of a Single Air Gap Axial Flux Permanent Magnet Synchronous Machine as a Gearless Drive**
Vanessa Linda Claus, Tankred Müller, Christian Rudolph, Hamburg University of Applied Sciences, D
- PP194** **Investigation of the Influence Caused by Coupling the Winding Systems in a Dual-Stator PMSM Using MATLAB/Maxwell CO-SIM**
Jan Winter, Marcus Ziegler, Bünyamin Tekir, Robert Zipprich, University of Kassel, D
- PP195** **Wide Band Gap Inverters and High Frequency Effects on Motor Drives**
Guilherme Bueno Mariani, Eslam Alfawy, Jannik Gade, Florian Wernegger, Infineon Technologies, A
- IGBT**
- PP196** **Desaturation Pulse-Based Turn-Off of Low-Saturation 1.2kV IGBTs for Reduced Turn-Off Energy Losses**
Vishwas Acharya Nayampalli, Hans-Günter Eckel, Jan Fuhrmann, University of Rostock, D

- PP197** **1200 V TRENCHSTOP IGBT7 H7 and emitter-controlled EC7 Rapid diode technologies define an enhanced benchmark for improved energy-efficient, fast-switching inverter applications**
Ajith Kumar Sekar, Jorge Cerezo, Infineon Technologies, A
- PP198** **Evaluation of Silicon Nitride as Moisture Barrier Layer for Enhanced Reliability of IGBT Modules During HV-H3TRB Test**
Shoubhik Gupta, Arthur Su, Lee Coulbeck, Yangang Wang, Dynex Semiconductor, GB
- PP199** **Investigation of the IGBT's and Diode's Ruggedness Under Short-Circuit Type III Conditions Well Beyond the SOA**
Madhu Lakshman Mysore, Thomas Basler, Chemnitz University of Technology, D; Roman Baburske, Franz-Josef Niedernostheide, Frank Pfirsch, Hans-Joachim Schulze, Infineon Technologies, D
- PP200** **Device Model of CSTBT with Highly Dosed Carrier Density in CS Layer**
Toshiya Tadakuma, Motonobu Joko, Mitsubishi Electric, J; Daniel He, Eugen Stumpf, Mitsubishi Electric, D;
- PP201** **Power Semiconductor Module Development for Low Voltage Hybrid Circuit Breaker Used in DC Power Grids**
Kenan Askan, Eaton Industries, A; Radek Klof, European Innovation Center, CZ

Charging Technologies II

- PP202** **Analysis and Experimental Verification of Efficiency Improvement of Automotive Onboard Battery Charger Based on MOSFETs Ideal Rectifier for Active Boost PFC**
Borislav Dimitrov, University of Warwick, GB
- PP203** **A SiC Based 60kW Three Phases Interleaved LLC Converter for EV Fast Charger**
Chen Wei, Jianlong Chen, Zongzeng Hu, Haiming Zhan, Fulin Zhang, Wolfspeed, CHN; Anuj Narain, Wolfspeed, USA
- PP204** **Cost Effective High Power MV Charger Concepts for Highway Charging Stations**
Daniel Neuner, Michael Hartmann, Graz University of Technology, A
- PP205** **Charger with Two Balanced Outputs for Li-Ion Battery Packs**
Christian Branas, Francisco Azcondo, Rosario Casanueva, Francisco Javier Diaz, Alberto Pigazo, University of Cantabria, E; Juan Carlos Viera, Universidad de Oviedo, E; Paula Lamo, Universidad Internacional de la Rioja, E
- PP206** **Achieving Fast Electric Vehicle Charging on a Limited Domestic Supply "Power Harvester"**
Vajira Dhanapala, Buckingham Magnetics, GB; Gayan Wickramasinghe, Dr Magneto Ltd, GB; David Gurwicz, D & N Electronics, GB; David Hughes, Benjamin Hunter, Kapila Warnakulasuriya, Teesside University, GB

Power Supplies

- PP207** **Optimized Power Processing Sharing Between the Converters of a Single-Phase Delta Uninterruptible Power Supply System**
Sergio Augusto Oliveira da Silva, Leonardo Campanhol, Vinícius de Souza, Rodrigo Modesto, Federal University of Technology –Paraná, BR
- PP208** **Effect of the Auxiliary Power Supply of Active Circuits on the Performance of Active EMI Filter**
Xavier Maynard, Sebastien Carcouet, Bacar Mohamed Nassurdine, CEA GRENOBLE, F; Denis Labrousse, Pierre-Etienne Lévy, SATIE, F; Jean Luc Schanen, G2ELAB, F
- PP209** **Quadratic Combined Forward-Flyback Converter**
Helmut Votzi, Felix Himmelstoss, University of Applied Sciences Technikum Vienna, A; Andreas Hofschweiger, MAGNA Powertrain, A
- PP210** **Modeling and Analysis of Boost Power Factor Correction Converter Operated in CrCM using Various Software Tools**
Pratiksha Patil, Martin Krueger Infineon Technologies, D
- PP211** **Extreme Step-Down Ratio Single-Stage Solution for 48V-to-1V Point-of-Load Converter**
Bima Nugraha Sanusi, Ziwei Ouyang, Chang Wang, Technical University of Denmark, DK
- PP212** **The Resonant Characteristics Comparison between Primary-Side Resonant and Secondary-Side Resonant Active Clamp Flyback**
Yang-Lin Chen, Fei Yang, Texas Instruments, CHN
- PP213** **Autonomous Minimization of Power Loss by Switching Frequency Adjusting Function for a DC–DC Converter**
Junichi Kashiwagi, Yohei Moriyama, Atsushi Yamaguchi, Ken Nakahara, ROHM, J
- PP214** **Digital GaN 300W AC-DC Power Supply**
Dominique Bergogne, Plinio Bau, Lucas Mistre, Thanh Hai, Phung, Cédric Reymond, Wise-Integration, F
- PP215** **Gallium Nitride Based High Density Power Factor Corrected AC-DC Converter for Next Generation Power Conversion Solution**
Chun Kit Cheung, Ziyang Gao, ASTRI, HK

Control Methods II

- PP216** **Voltage Stress Reduction for New 3L-ANPC Modulation Scheme Using Both Current Paths in Zero State**
Felix Eichler, Markus Meißner, Matthias Meißner, Steffen Bernet, Dresden University of Technology, D; Andreas Giessmann, SEMIKRON Elektronik, D

- PP217** **Optimisation of a Model based Controlled Power Converter Test Platform**
Dawid Koczy, Alexander Ernst, Wilfried Holzke, Bernd Orlik,
University of Bremen, D
- PP218** **Hybrid-Switch-Inverter - A New Approach Reducing the System Cost of the Electric Powertrain**
Michael Walter, Mark-M. Bakran, University of Bayreuth, D
- PP219** **Highly Dynamic Voltage Control of a Dual Active Bridge over the Full Voltage Range by Operating Point Dependent Manipulated Variable Limitation**
Georg Zieglmaier, Marc Hiller, Tobias Merz, Fabian Sommer,
Karlsruhe Institute of Technology, D
- PP220** **Analyzing the Influence of Rotating Voltage Vectors in Case of FCS-MPC-Controlled Matrix-Converter for PMSM**
Robert Zipprich, Jan Winter, Bünyamin Tekir, Marcus Ziegler,
University of Kassel, D
- PP221** **Real-time Validation of Quadratic Regression Model Based Predictive Control of Grid-side Converters**
Kristóf Gábor Bándy, MD Moshir Rahman Chowdhury, Péter Stumpf,
Zoltán Süto, Budapest University of Technology and Economics, H
- PP222** **Modified Third Harmonic Injection Modulation for Voltage Balancing in Multilevel Inverters**
Mehdi Zarei Tazehkand, Mehdi Baghdadi, University College London, GB

Power Converters III

- PP223** **Solid-State Transformers: How Far Have We Come?**
Rafael Medeiros, Ilknur Colak, Schneider Electric, F
- PP224** **SiC-MOSFET Assisted, Si-IGBT 1200 V Switch for 3-Phase DC-AC Converters with Overload Condition**
Andrea Piccioni, Infineon Technologies, A
- PP225** **High-Density, High-Power Converters Using Paralleled 3.3 kV All-Silicon Carbide Power Modules**
Ahmed Ismail, Ahmad Al-Hmoud, Yue Zhao, University of Arkansas, USA;
Ashish Kumar, Kraig Olejniczak, Wolfspeed, USA
- PP226** **A Design Methodology for a CLLLC Bidirectional Resonant Converter with an Integrated Transformer**
Sajad A. Ansari, Jonathan Davidson, Martin Foster, University of Sheffield, GB

EMC in Power Electronics

- PP227** **Retrofitting Industrial Machinery Driving Large Inertia Loads to Increase the Efficiency and Power Quality in Industrial Grids**
Alberto Pigazo, Francisco J. Azcondo, Christian Brañas, Rosario Casanueva, F. Javier Díaz University of Cantabria, E; Paula Lamo, International University of La Rioja, E
- PP228** **Efficiency and EMC Comparison of Si MOSFET and GaN HEMT Based Full Bridge DC-DC Converter**
Ekon Ayawo Roger, Eric Dupuy, Francois Bouvet, Synchrotron SOLEIL, F; Francois Costa, University Paris-Est Creteil, F; Mickaël Petit, SATIE Laboratory, F
- PP229** **Gain Adjustment Control for an Active EMI Filter**
Stefan Haensel, Siemens, D; Stephan Frei, Technical University Dortmund, D
- PP230** **Design and Simulation of a LISN and an EMC Filter of a Drive Inverter for an Open Industrial DC Grid**
Henriette Reineke, Technical University of Braunschweig, D; Simon Puls, Holger Borcharding, Technical University of Ostwestfalen-Lippe, D; Martin Ehlich, Lenze SE, D
- PP231** **Experimental Validation of Differential and Common Mode Equivalent Circuit of a Three Phase Level Vienna Rectifier**
Gonzalo Moreno Huerta, Daniel San Laureano Igartuburu, Indra Sistemas, E; Diego Ochoa Moreno, Power Smart Control, E; Antonio Lázaro Blanco, University of Madrid, E
- PP232** **Radio Disturbance Evaluation of Si- and GaN-Inverters**
Benedikt Kohlhepp, Julian Dobusch, Daniel Kübrich, Thomas Dürbaum, Friedrich-Alexander-University Erlangen-Nuremberg, D
- PP233** **An Active EMI Filter for Common-Mode EMI Mitigation in High-Power AC Systems**
Timothy Hegarty, Robert Blattner, Ashish Kumar, Abdallah Obidat, Texas Instruments, USA
- PP234** **Influence of DMC EMI Optimization on CMC EMI for DC-AC Isolated Power Converter Array**
Hugot Pichon, Jean-Christophe Crebier, Yves Lembeye, G2elab, F

Thermal Measurements and Cooling

- PP235** **Development of Heat Source for Performance Verification of Thermal Management for Double-Sided Cooled SiC-Power Semiconductors**
Simon Cepin, Holger Borcharding, University of Applied Sciences and Arts Ostwestfalen-Lippe, D
- PP236** **Investigation of a Non-Linear Two-Phase Immersion Cooling of Power Semiconductors**
Michael Gleissner, Mark-M. Bakran, Lukas Maar, University of Bayreuth, D; Björn Flieger, TLK-Thermo, D

- PP237** **Polymer-Based Impingement Cooling of Silicon Carbide Power Modules for Traction Applications**
John Mookken, Amith Jain Onsemi, USA
- PP238** **Subcooled LN2/LN2 at Boiling Point / GN2 for Cryogenic Cooling of Power Electronic Components in Aircrafts**
Timin Jacob, Gowtham Galla, Ravi Kiran Surapaneni, Airbus Upnext, D;
Swapnil Kharche, Matteo Tassisto, Ludovic Ybanez, Airbus UpNext, F
- PP239** **Super High Heat Dissipation Resin Sheet by Card House Type BN Filler**
Katsuhiko Hidaka, Ayano Imai, Toshiyuki Sawamura, Yuya Koga, Phuong Dao, Mitsubishi Chemical, J
- PP240** **Electronic and Semiconductor Testing Using Lock-in Thermography with Cameras in HD Resolution for Failure Detection**
André Kipp, Steffen Sturm, InfraTec, D
- PP241** **Comparison of Junction Temperature Measurement Using the TSEP Method and Optical Fiber Method in IGBT Power Modules Without Silicone Gel Removal**
Kaichen Zhang, Francesco Iannuzzo, University of Aalborg, DK;
Charles Leduc, Opsens Solutions, CDN
- PP242** **Measurement and Validation of Junction Temperatures of Chips in Automotive Traction Modules at Inverter Level**
Udaykumar Vangaveti, Arun Kumar Sessa, On Semiconductor, USA;
Dylan Cho, ON Semiconductor, ROK
- PP243** **Thermal Considerations for Y Capacitors in Wide Band-Gap Based Inverters**
Maurizio Tranchero, Paolo Santero, Ideas & Motion, I
- Renewable Energy Technologies and Grid Stabilisation**
- PP244** **Fault Ride-Through and Reactive Power Capability Analysis of Grid-Connected Fully Rated Converter Wind Turbines**
Gulasalkhon Musinova, Wilfried Hofmann, Technical University of Dresden, D
- PP245** **System Evaluation and Optimization of Wind Converters Using Dedicated Power Modules for Line-side and Machine-side Converters**
Marcel Morisse, Wilhelm Rusche, Florian Weiland, Infineon Technologie, D;
Lars Helle, Ole Damm Kristensen, Hardik Bodiwala, Philip Carne Kjaer, Vestas Wind Systems, DK
- PP246** **Field Data based Analysis of Microclimates and Humidity in PV Inverters**
Felix Kulenkampff, Sebastian Franz, Patrick Hercegefi, Lukas Menold, Fraunhofer ISE, D
- PP247** **Design and Optimization of CLLC Converter Enabling Highly-Efficient Partial Power Processing for Solar PV Applications**
YongDae Kwon, Francisco Freijedo, Wijekoon Thiwanka, Jonas Olschewski, Huawei, D; Thiago Pereira, Marco Liserre, Christian-Albrechts-University of Kiel, D

PP248 **Cost and Energy Efficient Bridgeless Totem-Pole PFC Using CoolSiC(TM) Hybrid Discrete IGBT for High Power SMPS Applications Achieves 80 PLUS Titanium Grade**
Syeda Qurat ul ain Akbar, Jae Eul Yeon, Infineon Technologies, A

Power Converters IV

PP249 **New Method for Determining the Peak Ripple Current for Different Modulation Techniques of Hard-Switching Three-Phase VSIs**
Bela Truschenski, Thomas Komma, Marcus Praast, Andreas Reinhold, Leipzig University of Applied Sciences, D

PP250 **A Novel Modified Sequence Decomposition in Power Control Scheme for Three Phase PV Inverter under Asymmetrical Grid Condition**
Khanh Hung Nguyen, Peter Zacharias, University of Kassel, D

PP251 **Impacts of Cross-Saturation on Sensorless Control of Synchronous Machines Using Alternating Signal Injection**
André Haspel, Vasken Ketchedjian, Marcel Kirschner, Jörg Roth-Stielow, University of Stuttgart, D

PP252 **Investigation of the Effects of Block Commutation and Field Oriented Control on PMSMs and Driver Electronics**
Ekrem Uyar, Goksel Kizir, Roketsan, TR

GaN Devices

PP253 **Gallium Nitride-Based Inverter for Three-Phase Permanent Magnet Motor Drives**
Gianluigi Forte, Andrea Spampinato, STMicroelectronics, I

PP254 **Trading – off GaN FET Performance with Advanced Si MOSFETs**
Giuseppe Longo, Giusy Gambino, Filippo Scrimizzi, STMicroelectronics, I

PP255 **Measurement of GaN HEMTs' Temperature Dependent On-State Resistance in Switching Operation**
Tianyu Li, Andreas Lindemann, Wenwen Yang, Otto-von-Guericke-University, D

PP256 **Characterization of Short Circuit Behavior of Parallel Connected GaN HEMT Power Semiconductors**
Jan Schmitz, Steffen Bernet, Markus Meißner, Technical University of Dresden, D

PP257 **Modelling and Experimental Validation of GaN Based Switching Leg in Inverter Topology for Motor Drives Applications**
Marco Palma, EPC, I; Vincenzo Barba, Salvatore Musumeci, University of Torino, I

PP258 **Using the Influence of Internal Gate Resistance on Gate Current Peak as TSEP for GaN HEMTs**
Kevin Ladentin, Andreas Lindemann, Otto-von-Guericke-University, D

PP259

A GaN-Based 250-kHz LLC Converter with Hybrid Analogue-Digital Control

Christophe Basso, Future Electronics, F; Josef Burger, David Woodcock, Zhi Zhang, Future Electronics, GB

PP260

Experimental Analysis of Short Circuit Robustness of GaN and SiC Cascode Devices

Renze Yu, Mana Hosseinzadelish, Saeed Jahdi, Chengjun Shen, Yasin Gunaydin, Xibo Yuan, University of Bristol, GB; Olayiwola Alatise, Jose Ortiz-Gonzalez, University of Warwick, GB

PP261

Fast Switching of High-Power GaN Transistors

Edward Shelton, Dan Rogers, University of Oxford, GB; Lucas Lu, Lei Kou, GaN Systems, CDN; Juan Castellino, Cambridge Design Partnership, GB; Patrick Palmer, Simon Fraser University, CDN
